

Technical Data Sheet

AW-704CWE

Usage	High solids, small particle size, type 1 carnauba wax emulsion that provides good rub resistance and slip properties for high gloss graphic arts applications.
Description	Carnauba wax emulsionType 1
Physical Properties	
Appearance:	Opaquetan liquid
Emulsifier Charge:	Anionic
Non-Volatile (%):	
Viscosity (cps):	Less than 100 cps
pH:	8 to 10
Solids Content:	39 to 41%
Storage & Handling	Recommended storage temperature is 40 to 90 °F. Do not subject product to freezing or extremely high temperatures. Keep container tightly closed to prevent skin formation. Product is stable for at least 3 months under normal conditions. If longer storage time or high storage temperature is expected, please contact A & W Products for formulation assistance. * Gently stir product before using
Applications:	Corrugated boxes, cartons, produce and poultry boxes, frozen meat boxes, Kraft paper, high moisture produce container, fiber glass insulation, MDF and OSB, general water repellent
Manufactured In	United States
