

Technical Data Sheet

AW-50

Usage

AW-50 is a cost effective, water-based emulsion that provides maximum water repellency to wood and wood composite products, edge seal, textile, paints and coatings, and adhesives. It is manufactured with a special emulsifier package to ensure storage stability.

Physical Properties

Appearance:	Milky white to off white liquid
Emulsifier Charge:	Anionic Wax Emulsion
Sheer Stability:	4 min.
Storage Temp:	40° to 94°F
Storage Life:	6 Months
Specific Gravity:	0.93 - 0.95
Brookfield Viscosity (cps):	35 to 200
pH:	8 to 9
Solids Content:	40 to 51%

Recommended storage temperature is 40 to 90 °F. Do not subject product to freezing or extremely high temperatures. Keep container tightly closed to prevent skin formation. Product should be handled with air pressure only.

Manufactured In **United States**
